Salma Alkhalily

AI & Data Science Engineer | Machine Learning | Software Engineering

M2 Data, Knowledge and Hybrid Artificial Intelligence (DKAI) student at Université Paris-Saclay, with 2+ years of professional experience in software development and implementation. Strong software engineering background combined with hands-on training in machine learning, data science, knowledge engineering, and big data. Experienced in developing web, mobile, and desktop applications across different platforms. Seeking a 6-month final-year internship in AI, Machine Learning, Data Science, or Data Engineering, starting in 2027.

EDUCATION

Master M2 Data, Knowledge and Hybrid Artificial Intelligence (DKAI)
Université Paris Saclay

09/2026 - Present *Paris, France*

Courses
- Graph Analytics & Knowledge Discovery in Graph Data
- Towards Hybrid and Explainable Artificial Intelligence
- Exploring Data Declaratively: Constraints and Patterns
- Towards Adaptive and Agentic AI
- From Symbolic to Neurosymbolic AI

M1 Data Science
Université Paris Saclay

09/2025 - 07/2026 *Paris, France*

Courses
- Hands on Machine learning with Scikit learn
- Machine learning algorithms and Hands-on NLP
- Mathematics for Data Science
- Large scale distributed data processing
- Distributed Systems for Massive Data Management
- Information retrieval

BSc Information Technology Engineering
Damascus University

10/2015 - 11/2020 *GPA 15.4/20*

Courses
- Software Engineering
- Algorithms, Data Structures & Databases
- Information Retrieval Systems
- Information Systems Security
- Web Applications
- Programming Languages

WORK EXPERIENCE

Software Engineer - Remote
Blue Smart Apps

04/2020 - Present *Damascus, Syria*

Achievements/Tasks
- Analysis, Design and implement functional and non-functional requirements raised by buisness stackholders
- Technologies used: Android development with Kotlin, Web APIs (google maps, algolia, google analytics), Firebase and Firebase functions, jetpack compose

SKILLS

Python | Software Development | Java | PHP, Laravel | Databases (SQL, Oracle) | Web Development | Design Patterns | Desktop Applications | Git | OOP | Rest API | UML | Android Development | Firebase | IOS (swift, swiftUI) | Kotlin | Latex | spark | MongoDB | Docker

PERSONAL PROJECTS

PolicyGap - AITSS Project Compeition (06/2026 - 07/2026)
- Developed a RAG-based system to analyse policy documents and identify gaps between stated objectives and available evidence. Implemented document embeddings, vector search, and LLM-based analysis to generate structured results.

Detecting Human, AI-Generated, and Mixed Text in NLP (01/2026 - 02/2026)
- Python project consisting of two main tasks: text classification (human, AI-generated, or mixed content) and regression analysis to predict the proportional percentage of each text category.

SHACL Shape Generation and Validation Tool (03/2024 - 05/2024)
- Generate SHACL shapes with uniqueness and sameAs rules from RDF keys, and validate them against different RDF sources that have same or equivalent keys. Use Apache Jena with a JavaFX+CSS UI to run workflows and output detailed violation reports.

ListedNearMe (04/2020 - 03/2023)
- Create a local marketplace app using Google Maps API. Users can buy/sell used products nearby, search by price/category, contact sellers, make offers, rate transactions, and boost listings with Google Billings.

CERTIFICATES

Participation in the VI Summer School "Artificial Intelligence Technologies 2026 (06/2026 - 07/2027)

Ivan Franko National University of Lviv. *July 2026* ***Credential ID:*** *AIT-2026-0497*
